DETAILED ACTION

Allowable Subject Matter

Claims 1-26 are allowed. The following is an examiner's statement of reasons for allowance: the prior art made of record teaches numerous variations of an automatic matching and tuning circuit but failed to teach the particular combination of reactive components as described in independent claim 1 including a primary circuit comprising an adjustable tuning capacitor connected in series with a primary winding of a pair of mutually coupled coils adapted to connect to a source of RF power, a secondary circuit comprising a series connection of a secondary winding of said pair of mutually coupled coils and a fixed capacitor connected to an input of a transformer and a tertiary circuit comprising a connection of an output of the transformer and an input of a tapped loading coil connected to said load.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art is made of record as teaching various configurations for an automatic matching and tuning network and not relied upon but is considered pertinent to applicant's disclosure: Luetzelschwab et al. (US 6,992,543), Williams et al. (US
